

Prescription Recording and Pharm. Calcs

Objectives

- Be familiar with procedures for extemp. products in pharmacies;
- Become familiar with the “Batch and Prescription Record of Extemporaneous Prepared Product” pro forma;
- Become proficient with calculations involving mmols, mEq and mOsmols.

Remember (for next week)

- If you don't print your pro forma, you will NOT be allowed in.
- Complete the batch record and prescription
- Read the prescription, fill out the pro forma and check APF/AMH/Martindale methods.

Proforma

- Name
- Date of manufacture
- Product
- Indication for use
- Source of formula
- Dosage check (APF, AMH)

Batch Record

- Product Name
- Batch Number
- Batch Size
- Ingredients
- Directions
- Storage
- Expiry Date
